

## **CPR In Schools Training Kits**

The American Heart Association's newly upgraded CPR in Schools Training Kit™ enables students to learn the lifesaving skills of CPR in just one class period. Plus, the kit teaches AED use and choking relief. The easy-to-use kit is designed specifically for the needs of schools. The kit's brand new wheeled bag allows for convenient movement from classroom to classroom and easy storage. It's also reusable – one kit can train hundreds of people.

Help Create the Next Generation of Lifesavers™

About 90 percent of people who suffer out-of-hospital cardiac arrests die. CPR, especially if performed immediately, can double or triple a person's chance of survival. Sadly, most of the time it doesn't happen that way. The American Heart Association wants all students and educators to learn CPR, putting more qualified lifesavers in our communities. The stress-free CPR in Schools Training Kit is designed precisely for educational environments and can be facilitated by anyone. The kit contains everything needed to train 10 to 20 people at once in CPR. Repeat the process to train a class, a grade - or even your entire campus!

*To Order: **School Health** is the sole distributor of the CPR in Schools Training Kit.*
