Open Resource Exams in 2015 Guidelines Courses

As part of new education methodologies, the AHA has adopted an open resource policy for exams administered in AHA CPR and ECC courses.

Open resource means that students may use resources for reference while completing the exam.

Resources could include the course provider manual either in printed form or as an eBook on personal devices, any notes the student took during the provider course, the 2015 Handbook of ECC, the *2015 AHA Guidelines Update for CPR and ECC*, posters, etc. Open resource does not mean open discussion with other students or the Instructor.

For more information on open resource exams, please view the [2015 Guidelines Open Resource Exam FAQ](#), posted on the AHA Instructor Network in the Additional Tools > Training Updates section.
